

# Q-Logic 3 Evolution: An Advanced Programming Platform for Drive Controls

0.6 CEU/6.0 CEC

### When

Friday, March 17th, 2017

9:00AM-4:00PM

### Where

Raymond G. Murphy VA Medical Center  
1501 San Pedro Dr. SE  
Albuquerque, NM 87108

### Course Description

Keeping up with changes in power wheelchair electronics is very important for the clinician and ATP working with consumers in the field. Enhancements in electronics can bring new levels of independence for a consumer. The Q-Logic 3 system has new enhancements that truly allow the electronics to be able to be customized to the individual significantly. This course will provide a hands-on approach to how specialty controls can be programmed with maximal benefit to the consumers that need these electronics. Clinical scenarios will be offered to assist with understanding the application of new features.

### Learning Objectives

1. The participant will be able to name three clinical benefits the Q-Logic 3 system offers to consumers.
2. The participant will be able to list three new GUI screens and how they can help a consumer with achieving greater independence.
3. The participant will be able to name three new programming features that will benefit head array users.
4. The participant will be able to list two new features of the Q-Logic 3 system that will benefit proportional input users.
5. The participant will be able to list two the benefits that the iAccess module offers to consumers.
