INTERACTIVE ASSIST

Interactive Assist from Quantum Rehab® is a new app which provides a direct real-time connection from a power chair's electronics to a provider's programming station. The connection provides the technician with full system and diagnostics information along with tools, such as a real-time mirror image of the power chair's electronics display, to aid in reducing service trips.

Eliminate Wasteful Trips

Save time and money...

- Reduce trips to client's home.

- Find detailed diagnostic information.
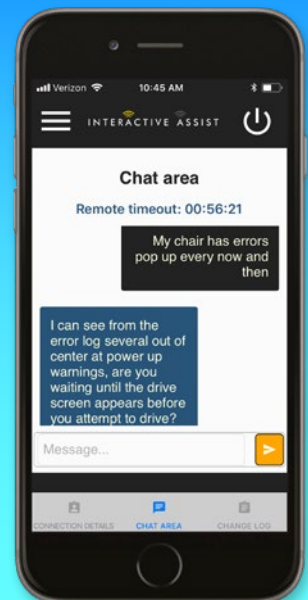

Real-time monitoring and mirroring.

Assists with programming chairs (must be performed using a programming station with a technician onsite).

Communicate with client via text chat.

Remote timeout: 00:56:21

My chair has errors pop up every now and then

I can see from the error log several out of center at power up warnings, are you waiting until the drive screen appears before you attempt to drive?
