

Wheelchair Seating

Medicare Coding & Coverage (Revised October 1, 2023)

The only products which may be billed to Medicare using codes E2601-E2608, E2611-E2616, E2620, E2621, and E2622-E2625 and the only brand name products that may be billed using codes E2609 or E2617 are those products for which a written coding verification has been made by the Pricing, Data Analysis, and Coding (PDAC) contractor. A Product Classification List with products which have received a coding verification can be found on the PDAC web site. https://www.dmepdac.com/

Wheelchair seat and back cushion codes are all-inclusive. Use of HCPCS code K0108 or any other HCPCS code to bill separately for added components such as foam blocks, gel packs, air cells, or equivalent material is considered incorrect coding. There is no separate payment for mounting hardware for a seat or back cushion.

Seat and back cushions provided for use with a transport chair (E1037, E1038) will be denied as not reasonable and necessary. There is no separate payment for a wheelchair seat or back cushion when it is used with a roll-about chair (E1031).

There is no separate payment for a solid insert (E0992) that is used with a seat or back cushion because a solid base is included in the allowance for a wheelchair seat or back cushion.

General Use Cushion or Back

E2601	General use wheelchair seat cushion, width less than 22 inches, any depth
E2602	General use wheelchair seat cushion, width 22 inches or greater, any depth
E2611	General use wheelchair back cushion, width less than 22 inches, any height, including any
	type mounting hardware
E2612	General use wheelchair back cushion, width 22 inches or greater, any height, including any
	type mounting hardware

A general use seat cushion and a general use back cushion are covered for a beneficiary who has a manual wheelchair or a power wheelchair with a sling/ solid seat/back which meets Medicare criteria.

If the beneficiary does not have a covered wheelchair, then the cushion will be denied as not reasonable and necessary.

If the beneficiary has a POV or a power wheelchair with a captain's chair seat, the cushion will be denied as not reasonable and necessary. For beneficiary's who meet the coverage criteria for a power wheelchair who do not have special skin protection or positioning needs, a power wheelchair with a captain's chair seat provides adequate support.

If a general use cushion is provided with a power wheelchair with a sling/solid seat/back instead of a captain's chair, both the wheelchair and the cushion will be denied unless one of the following criteria is met:

- 1. The cushion is provided with a power wheelchair base that is not available in a captain's chair model: codes K0839, K0840, K0843, K0860-K0864, K0890, or K0891; or
- 2. A skin protection and/or positioning seat or back cushion that meets coverage criteria is provided.

Skin Protection Cushion

E2603	Skin protection wheelchair seat cushion, width less than 22 inches, any depth
E2604	Skin protection wheelchair seat cushion, width 22 inches or greater, any depth
E2622	Skin protection wheelchair seat cushion, adjustable, width less than 22 inches, any depth
E2623	Skin protection wheelchair seat cushion, adjustable, width 22 inches or greater, any depth

A skin protection seat cushion is covered for a beneficiary who meets both of the following criteria:

- 1. The beneficiary has a manual wheelchair or a power wheelchair with a sling/solid/seat/back and the beneficiary meets the Medicare coverage criteria for it; and
- 2. The beneficiary has either of the following;
 - a. Current pressure ulcer or past history of a pressure ulcer on the area in contact with the seating surface as reflected in a Group 1 ICD-10 code; or
 - b. Absent or impaired sensation in the area of contact with the seating surface or inability to carry out a functional weight shift as reflected in Group 2 ICD-10 code.

The presence of a covered diagnosis code alone is not sufficient by itself to support coverage. Medical records must support policy requirements to justify payment.

Group 1 ICD-10 Codes

a. The beneficiary has a current pressure ulcer or past history of a pressure ulcer on the area in contact with the seating surface; or

E2621	Positioning wheelchair back cushion, planar back with lateral supports, width 22 inches or
	greater, any height, including any type mounting hardware

Positioning Accessories

E0953	Wheelchair accessory, lateral thigh or knee support, any type, including fixed mounting
	hardware, each
E0955	Wheelchair accessory, headrest, cushioned, any type, including fixed mounting hardware
E0956	Wheelchair accessory, lateral trunk or hip support, any type, including fixed mounting
	hardware, each
E0957	Wheelchair accessory, medial thigh support, any type, including fixed mounting hardware,
	each
E0960	Shoulder harness/straps or chest strap, including any type mounting hardware

A positioning seat cushion, positioning back cushion and positioning accessory (E0953, E0955*-E0957, E0960) is covered for a beneficiary who meets both of the following criteria:

- 1. The beneficiary has a manual wheelchair or a power wheelchair with a sling/solid seat/back and the beneficiary meets Medicare coverage criteria for it; and
- 2. The beneficiary has any significant postural asymmetries that are due to one a Group 2 or Group 3 diagnosis code.

The presence of a covered diagnosis code alone is not sufficient by itself to support coverage. Medical records must support policy requirements to justify payment.

*A headrest, HCPCS E0955, is also covered when a beneficiary has a covered manual tilt-in-space, manual semi of fully reclining back on a manual wheelchair, and manual fully reclining back on a power wheelchair, or power tilt and/or recline power seating system.

Skin Protection & Positioning

E2607	Skin protection and positioning wheelchair seat cushion, width less than 22 inches, any depth
E2608	Skin protection and positioning wheelchair seat cushion, width 22 inches or greater, any
	depth

E2624	Skin protection and positioning wheelchair seat cushion, adjustable, width less than 22
	inches, any depth
E2625	Skin protection and positioning wheelchair seat cushion, adjustable, width 22 inches, any
	depth

A combination skin protection and positioning cushion is covered for a beneficiary who meet the criteria for <u>both</u> a skin protection seat cushion and a positioning seat cushion.

Criteria (a), (b), or (c) must be met AND criteria (d) must be met.

- If there is a past history or current pressure ulcer in the area of contact with the seating surface –
 Group 1 ICD-10 code; or
- b. If there is absent or impaired sensation in the area of contact with the seating surface due to a Group 2 ICD-10 covered diagnosis for skin protection cushions; or
- c. If there is an inability to carry out a functional weight shift due to one of the diagnoses listed as a Group 2 ICD-10 covered diagnosis for skin protection cushions; and
- d. If the beneficiary has significant postural asymmetries due to one of the diagnoses listed as a Group 3 ICD-10 covered diagnosis for positioning cushions.

The presence of a covered diagnosis code alone is not sufficient by itself to support coverage. Medical records must support policy requirements to justify payment.

Group 1 Diagnosis Codes

a. The beneficiary has a current pressure ulcer or past history of a pressure ulcer on the area in contact with the seating surface due to a diagnosis in this section; or

Custom Fabricated Seat and Back Cushions

E2609	Custom fabricated wheelchair seat cushion, any size
E2617	Custom fabricated wheelchair back cushion, any size, including any type mounting hardware

For a custom fabricated seat or back cushion criteria (a) must be met and criterion (b), (c), or (d) must be met:

- a. For E2609 or E2617, there is a comprehensive written evaluation by a licensed/certified medical professional such as a PT or OT (who has no financial relationship with the supplier) which explains why a prefabricated seating system is not sufficient to meet the beneficiary's seating and positioning needs; and
- b. For E2609, there is a past history of or current pressure ulcer in the area of contact with the seating surface; or
- c. For E2609, there is absent or impaired sensation in the area in contact with the seating surface or an inability to carry out a functional weight shift due to one of the diagnoses listed as a covered diagnosis for skin protection cushions; or
- d. For E2609 or E2617, the beneficiary has significant postural asymmetries due to one of the diagnoses listed as a covered diagnosis for positioning cushions.

The presence of a covered diagnosis code alone is not sufficient by itself to support coverage. Medical records must support policy requirements to justify payment.
